FIRST LIGHT™
USA

At First-Light USA, we've been developing and delivering tactical lighting solutions with unmatched versatility to Warfighters and Law Enforcement personnel for over 15 years. We're proud to have established the standard in point-of-injury illumination on the battlefield. Our advances in portable illumination for austere environments have earned us standard issue positions with Army Combat Medics, the Battalion Aid Station set, Combat Lifesaver Equipment Sets, and Abrams Tank crews. First-Light USA has also found a home with Local, State, and Federal Law Enforcement as we have delivered lights to countless police departments and agencies including the US Border Patrol, the Federal Bureau of Investigation, and numerous state-level police forces.

**FROM THE FARM
TO THE
FIGHT**

Our battle-tested lights are also perfect for first responders, hunters, campers, outdoor adventurers, personal defense, and everyday use. They are the ideal tools for anybody that finds darkness an obstacle in getting the job done.

RED+GREEN MIX

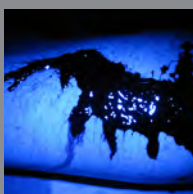

First-Light USA has strategically designed select models of our lights to enhance visibility at the point-of-injury and perform across the full spectrum of Tactical Combat Casualty Care (TCCC). Our models that offer a unique mix of red and green LEDs highlight the color red in low-light situations, while subduing other colors when compared to using blue, red, or green light alone.

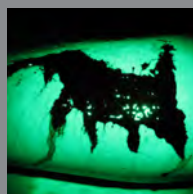

**Red + Green
Mix**

**Red Light
Only**

**Blue Light
Only**

**Green Light
Only**

We are proud to offer preferred pricing to all Active Duty Military, Reservists, Guardsmen, Veterans, LEO's, and First Responders. Contact us directly for more information.

CATEGORIES

At First-Light USA, our lights are carefully designed to provide specific functionality depending on the intended use. For example, Combat Medics prefer models that have our unique red+green mix for highlighting blood at the point-of-injury, while other Warfighters may prefer Infrared, Red, Blue, Green, or even Night Vision-friendly illumination. From LED configuration to procurement through the Defense Logistics Agency, the legend below provides a quick reference to the key elements of each of our products.

Indicates red+green mix for wound identification.
Ideal for Medics and Combat Lifesavers.

Product has a National Stock Number and is
available through the Defense Logistics Agency.

Indicates the presence of Infrared output and an IR
beacon for use with night vision optics.

Indicates that the light is equipped with blue and
red LEDs and features a white/red/blue emergency
beacon.

NVIS-Compatible (Night Vision Imaging Systems).
Ideal for Aircrew.

Indicates the presence of red LEDs and a white/red
emergency beacon designed specifically for EMTs.

General purpose light for everyday use.

TORQ[®]

Available Models: Standard, MED, LE, NV, EMS

The incredibly functional and ergonomically intuitive TORQ flashlight provides white-light illumination with momentary output, three intensity levels of constant-on, and lock-out mode* all at the touch of a finger. Secondary LED colors include green, red, blue, red+green mix, and IR depending on the model. TORQ also features a tactical strobe and either a red/white, red/white/blue, red/white/green, or IR Beacon depending on the model. **Double-Click for Color when in Lock-out mode.*

Platform-Wide Specifications:

- Max Output: 200 Lumens
- 320°-Rotating Head
- Power Source: AA Batteries (2)
- Weight: 4.4 oz.
- Dimensions: 3.9"H x 2.6"L x 1.4"W
- Construction: High-Impact, Glass-Filled Nylon
- Runtime: Max Output - 10 Hours
- 5-Year Warranty

TORQ®

The standard TORQ offers output of white light along with red, blue, and green colored LEDs. All output colors feature constant-on and brightness control at the touch of a finger. TORQ comes with the standard steel clip and is compatible with all of our TRS Mounts. Available in Coyote Brown and Black.

Specifications:

- LED Output: White, Red, Blue, Green
- White/Red/Green Safety Beacon
- White-Light Strobe
- Steel Retention Clip
- Available in Coyote Brown & Black

- Lifetime Warranty

T-MAX[®] PRO

T-MAX PRO
National Stock Number:
6230-01-706-4743
Part#: 992023

With powerful white-light output and our most robust package of colored LED options, the T-MAX PRO is the perfect choice for anyone looking for a truly tactical-to-practical lighting tool. Featuring three output levels of constant-on white light and red, blue, and green secondary color options, the T-MAX Pro also provides a red+green mix option designed specifically for illuminating blood at the point-of-injury. From advanced military operators to civilians, this light can handle virtually any situation where low-light can be an obstacle or even an adversary.

Specifications:

- LED Output: White, Blue, Red, Green, Red+Green Mix
- Red/White/Green Safety Beacon
- Tactical White-Light Strobe
- Steel Retention Clip (180°-Rotation)

T-MAX[®] LE

T-MAX LE Kit w/ TRS Belt Mount

National Stock Number:

6230-01-706-4756

Part#: 992026-BELT-BK

T-MAX LE (Light Only)

Part#: 992026

The T-MAX LE tactical flashlight delivers powerful white light along with red, blue, green, and our red+green mix for wound identification in low-light circumstances. A tactical strobe and red/white/blue emergency beacon make the T-MAX LE the premium choice for Law Enforcement Officers and TACMED personnel. All output colors feature constant-on and brightness control at the touch of a finger. The T-MAX LE is also available kitted with the TRS Belt Mount for easy integration onto the duty belt. Available in Black.

Specifications:

- LED Output: White, Red, Blue, Green, Red+Green Mix
- Red/White/Blue Safety Beacon
- White-Light Strobe
- Steel Retention Clip (Standard w/ T-MAX LE)
- TRS BELT Mount (when Kitted)

T-MAX[®] NV

T-MAX NV Red/Blue

Part#: 992021-RB

T-MAX NV Red/Green

Part#: 992021-RG

The T-MAX NV provides powerful white-light illumination and secondary colors of IR, red, green, red+green mix, or IR, red, and blue. T-MAX NV features three intensity levels of constant-on, lock-out mode, a safety beacon and ready-strobe function designed to disorient subjects with a quick touch of the thumb. The T-MAX NV is also available as a TRS Kit with the MOLLE Mount or as a TC3 Kit that comes with the the T-MAX NV Red/Green, the MOLLE Mount and a Task Light that replaces the standard tailcap. Task Light available in Blue or UV.

Specifications:

- LED Output: White, IR, Red, Green, Red+Green Mix or IR, Red, Blue
- Red/White/Blue or Red/White/Green Emergency Beacon
- White-Light Strobe
- Steel Retention Clip

T-MAX[®]

T-MAX (white-light)

National Stock Number:

6230-01-706-4749

Part#: 992020

The T-MAX (white-light-only) is the ultimate general purpose flashlight with constant-on, momentary, and brightness control in a rugged and compact form designed to be used handheld or hands-free. On the trail, in the shop, or even around the house, T-MAX is the last flashlight you'll ever need.

Specifications:

- LED Output: White
- Tactical White-Light Strobe
- Steel Retention Clip (180°-Rotation)

TRS MOUNTS

Immediately force multiply the functionality of your light with First-Light USA's line of patented Tactical Retention System (TRS) mounts. With rugged construction and ergonomic design, TRS mounts allow any of our lights to be integrated comfortably into duty belts, worn on tactical vests, clipped to backpack straps, and firmly attached to ferrous surfaces.

TRS MOLLE MOUNT

The TRS MOLLE Mount provides mounting capabilities to MOLLE equipped gear, providing hands-free and adjustable illumination. Available in Coyote Brown, Foliage Green, and Black.

Coyote Brown TRS MOLLE Mount - Part#: 930029-4
National Stock Number: 6230-01-595-5264

Black TRS MOLLE Mount - Part#: 930029-1

Foliage Green TRS MOLLE Mount - Part#: 930029-2
National Stock Number: 6230-01-595-5251

TRS BELT MOUNT

Holster or unholster the tactical light on your duty belt with the TRS Belt Mount. Clip features 180° of rotation allowing the light to pivot while holstered. Available in Coyote Brown, Foliage Green, and Black.

Coyote Brown TRS MOLLE Mount - Part#: 930022-4

Black TRS Belt Mount - Part#: 930022-1

Foliage Green TRS MOLLE Mount - Part#: 930022-2

TRS MAGNET MOUNT

The TRS Magnet Mount is constructed of a high-strength flexible material that allows the light to be mounted to both flat and curved ferrous surfaces. Rubberized construction secures the mount and eliminates any unnecessary movement. Available in Coyote Brown, Foliage Green, and Black.

Coyote Brown TRS Magnet Mount - Part#: 930021-4 - NSN: 5340-01-626-0047

Black TRS Magnet Mount - Part#: 930021-1

Foliage Green TRS Magnet Mount - Part#: 930021-2

ACCESSORIES

Task Light

Blue Task Light

National Stock Number:

6230-01-595-5247

Part#: 999100-BL

UV Task Light

National Stock Number:

6230-01-595-5726

Part#: 999100-UV

The Task Light provides diagnostic ultra-violet (UV) or blue illumination in low-light tactical combat casualty care situations, and replaces the standard Tomahawk or T-MAX tactical flashlight tailcap. The UV light can also be used to identify watermarks and holograms when examining credentials or identification documents. Powered by three CR1616 coin cell batteries.

Finger Loop

Available in medium, large, x-large and as a kit of all three sizes, the Finger Loop attachment allows you to adjust your finger hold around the Tomahawk & T-MAX tactical flashlights to best fit your hand size.

MOLLE Steel Clip
Part#: 530137

TORQ Dovetail Side Panel

The Dovetail Side Panel makes your TORQ compatible with all of our TRS Mounts – Belt, MOLLE, and Magnet. (Please note: Dovetail Side Panels are included with our TRS Mounts.)

Dovetail Side Panel
Part#: 992020

GLIDR[®]

Available Fall 2023

Originally designed & developed under an AFWERX SBIR contract, GLIDR/SLIDR represents the most versatile illumination platform ever made available to Warfighters. Combining a vast number of features and functions, GLIDR/SLIDR thoughtfully and elegantly meshes the functionality of multiple existing lights into a single compact device. Powered by a single AA battery, GLIDR/SLIDR offers adjustable brightness of all output colors, a Lock-Out Mode to prevent inadvertent discharge of the light, and a Double-Click-for-Color to access the colored LEDs from Lock-Out Mode.

GLIDR Specifications:

- Output: White, NVIS (MIL SPEC 3009), IR
- IR Beacon, Tactical White-Light Strobe
